

FY 2024-25 Conceptual Portal Submittals

Project ID	Project Name	Cooperator	Description	Cost-Share Amount Requested
2998	Oakmont Reclaimed Water Ext Ph 6	GRU	Extend reclaimed water lines to 158 homes plus common areas to offset 0.055mgd of groundwater for irrigation.	\$226,542.00
3116	Clyde Street Stormwater Pond Repairs	Town of Mayo	Design and construct repairs and improvements to the Clyde Street SWMF in Mayo, FL.	\$218,580.00
3118	Town of Greenville Water Distribution System Improvements	Town of Greenville	Replace the Town of Greenville's water distribution system to conserve of 1.3 million gallons/year of water loss.	\$4,128,160.00
3130	New Well Installation	City of Archer	A new well will be installed in the City of Archer to improve water quality and replace aging infrastructure.	\$567,600.00
3131	Raising of Elevated Storage Tank	City of Archer	Increase the elevation of the elevated storage tank in the City of Archer to increase water pressure and reduce flushing caused by boil water notices.	\$260,400.00
3132	New Mag Meters At Well	City of Archer	Mag Meters will be installed at the new well in the City of Archer to improve water quality and replace aging infrastructure.	\$87,840.00
3134	Smart Meter Installation at Homes	City of Archer	Smart Meters will be installed at the homes of users in the City of Archer to improve water quality and replace aging infrastructure.	\$1,140,480.00
3184	Cross City Flood Management Improvements	Town of Cross City	Improve the stormwater management system located west of Ruth Rains Middle School on the west side of CR 351.	\$66,891.83
3187	Greenville Southside Flooding Mitigation	Town of Greenville	Match funding for Resilience and Coastal Protection for improvements to two stormwater culverts and build a more defined channel between them to reduce flooding of residents on the south side of town.	\$25,000.00
3221	Public Water Supply Efficiency Improvements/Meter installation	Suwannee Water and Sewer District	Older community with aging infrastructure. This project will provide for the needed improvements to accurately measure water consumption and water loss.	\$190,410.00
3223	Suwannee River Water Management District Watershed Planning Initiative	AECOM	Creation of preliminary scope of work, initial flood modeling & submission of draft WMP to CRS officials for approval.	
3235	Quail Run Test Well	Big Bend Water Authority	Construct a 500 gpm test well north of the existing wellfield to determine water quantity and water quality. Well will be designed and constructed to potable well standards.	\$270,000.00
3236	Holly Hills Stormwater Pond Improvements	City of Archer	This project seeks to expand and replace non-functional structures of the current ponds to reduce issues.	\$55,930.00
3237	Wilson Robinson Park Stormwater Pond Improvements	City of Archer	This project aims to expand and improve the existing stormwater pond in Wilson Robinson Park to mitigate adverse effects of storm events.	\$112,276.00
3238	Depot Street Stormwater Pond	City of Archer	A stormwater pond is to be constructed in a parcel owned by the City of Archer which will mitigate flooding in the area and provide needed stormwater treatment.	\$137,906.00
3274	Gwen Lake Restoration	City of Lake City	Sediment and nuisance vegetation removal from Gwen Lake. Reconstruction of outlet control structure and restoration of open water habitats.	\$1,580,000.00
3299	Agricultural Regional Water Quality Projects - Enhanced BMP Implementation Pilot Project	Florida Department of Agriculture and Consumer Services	Pilot phase of agricultural regional water quality project aimed at increasing nutrient and water use efficiency.	Not provided
3300	Agricultural Regional Water Quality Projects - Enhanced BMAP Implementation	Florida Department of Agriculture and Consumer Services	Control and/or mitigate water quality impacts associated with agricultural production by providing cost share funding to implement a suite of BMPs	\$15,000,000.00
3302	Rum Island - Stabilization & Boardwalk	Columbia County	Repair the previously installed Shoresox, provide additional riverbank stabilization, and install 117 linear feet of boardwalk over the Shoresox and stabilized areas.	\$212,900.00
3352	Automatic Meter Reading Installation for Water Meters	City of Perry	The new meters will be more accurate and have the ability to detect leaks and high usage for the customer and will reduce labor to read.	\$1,500,000.00
3378	Large AWS Projects Spend Plan	Columbia County Board of County Commissioners	Design, permitting, and construction of a new 500,000 gpd WWTP, lift-stations, force mains, reuse mains, and sprayfield in Ellisville.	\$59,500,000.00
3393	Park Street Drainage Well Replacement	City of Live Oak, Florida	Replacement of a Class V injection well within the City of Live Oak and the construction of a stormwater management facility to provide water quality treatment and sediment/trash screening.	\$481,031.00

FY 2024-25 Conceptual Portal Submittals

Project ID	Project Name	Cooperator	Description	Cost-Share Amount Requested
3394	Lake Mary Drainage Improvements	City of Live Oak, Florida	Replacement of two (2) Class V injection wells within the City of Live Oak and the installation of sediment/trash screening.	\$856,400.00
3422	Water Meter Purchase Project	Town of Brooker	Purchase and install approximately 234 water meters to include software.	\$230,000.00
3487	W3C Start-Up and Operational Costs	Waccasassa Water and Wastewater Cooperative (W3C)	This project will provide estimated start-up and operational costs for the W3C from formation through the first 2 years of operation.	\$50,000.00
3530	Unifying Coastal-Inland Compound Flood Maps in the SRWMD Region	University of Florida	This project will produce a unified coastal-inland compound flood map	\$ 750,827.00
